

Responsible AI for Social Good

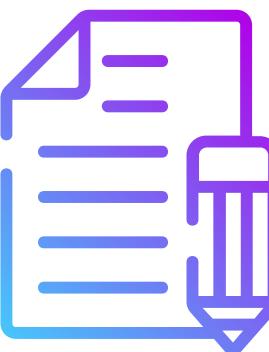

VidyutGyana : Pitch Deck

Presented by BodhaSangam

Problem Statement

- Despite technological advancements, the education system falls behind, leading to inefficient student output, a significant portion of human resources going underutilized.
- The absence of a smart population hampers the potential GDP, and despite India's youthful demographic, the nation has yet to attain superpower status.

Problems Identified :

Problem 1

Education System Inefficiency:

- Student profile represented by a normal distribution curve, with over 60% inefficiency.

Problem 2

Industry Producing Inefficient Students:

- Resulting in human resource underutilization.

Problem 3

Youthful Population Potential:

- India's population is predominantly youth.
- Despite this, the nation is far from achieving superpower status.

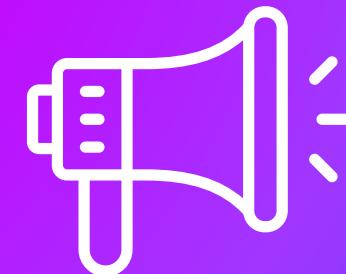

Proposed Solution :

“ VidyutGyana ”

- **Revolutionizes Education:** Integrates AI for a personalized learning experience.
- **Adaptive Learning Model:** Addresses inefficiencies in the current education system.
- **Untapping Student Potential:** Ensures no student's potential is left untapped.

Unique Selling Proposition

04

Collaborative Educational Ecosystem

01

Personalized Learning Experience

02

Real-Time Progress Tracking

03

Adaptive Content Delivery

Alignment with Theme and Ethics :

- **Alignment with Theme: VidyutGyana**

- Revolutionizes education for societal betterment.
- Leverages AI positively for inclusive and adaptive learning.

- **Ethical Considerations at Core:**

- Prioritizes data privacy and security.
- Adheres to ethical standards ensuring fairness and transparency.
